Common Sense Hand Hygiene

Provide high quality & low cost products

Evaluate the efficacy of the products

Implement tools to increase education

Implement tools to raise awareness

Symmetry offers a complete line of innovative soaps, lotions, hand sanitizers, and dispensers for all markets including healthcare, schools and government, retail, food service, manufacturing, automotive, and many more.

Cost Effective

Soap is measured by cost-per-push. To find the cost-per-push, take the cost of Symmetry soap and divide by the number of hand washes. We dispense at 0.9 ml on liquid and 0.6 ml on foam.

Bag Features

Symmetry soap bags are flexible and hermetically sealed to ensure no contamination. Receive great end-use-cost with a 99% evacuation rate. Each bag comes with pump attached.

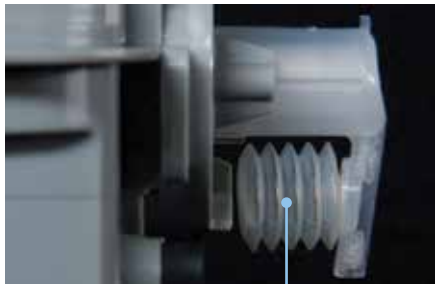

Adaptability

Symmetry dispensers use both liquid and foam soaps. This versatility ensures that one dispenser will meet all needs. This gives the customer the option of switching between Symmetry lotion and foaming products.

ADA Compliant

Symmetry dispensers require less than 5 lbs. of pressure to activate and are operable with one hand. There is no tight grasping, pinching, or twisting of the wrist.

"No-Drip"

The Patented "No-Drip" foam bellows ensures a clean countertop after every push.

"Repair-In-Place" Technology

In the event that repairs are needed, covers, sight windows or levers may be replaced without taking down the entire dispenser.

Durability

Symmetry dispensers are made of durable ABS plastic, able to hold up to the rigors of any facility.

Large Sight Window

Viewing the remaining product level can be difficult in most dispensers. Symmetry dispensers use oversized sight windows for visual product inspection. Save time and money with this 'maintenance at a glance' feature. Improve the length of usage by keeping soap bags in dispensers longer.

Hidden Lock

Space Saving

Offering a sleek and stylish design, Symmetry's footprint on a mirror is minimal.
